Registration is a big deal and your student needs to know what to expect. Check out our recommended tips & tricks to help reduce stress as they prepare to register for courses in the fall!

**STUDENTS SHOULD:**

**Know their degree audit**
Students should look at their Degree Audit/My Progress in Self-Service to check for classes they still need to take.

**Check their Academic Map**
Students can review an Academic Map for their major on the portal. The map serves as a suggested sequence and is flexible. Need to make an adjustment? The student should speak with their advisor.

**Get checked off**
Students need to meet/communicate with their advisor to get ‘checked off’. Don't forget! Advisors have a wealth of information and can help students plan, as well as answer registration related questions.

**Check for Holds**
There are many reasons for a hold on a student’s account. If a hold is on their record, they will not be able to register, even if they are checked off by an advisor. The hold must be resolved.

**Know when to Register**
Registration dates and times are assigned by seniority. This means seniors with the most credit hours register first. Fall registration begins April 3rd.

**Be flexible**
This is so important to remember! If one course is filled, students should explore others that meet the same requirement. **GREEN TERROR TIP:** Always be ready with backup classes and options.
